

A Comparative Report on the Loop Scheduling Options in OpenMP

Exam No. B024703

October 23, 2016

1 Introduction

Two loops were given to me. I had to parallelise them. This report describes how i did it and what the best way to do it was. I tried a few ways and measured how fast they all were.

2 Methods

2.1 Stage 1

parallelise that code.

3 Results

4 conclusion

The best way to do it was:
